

IASOSSC presents

INSIGHT 2.0

DATATHON RULEBOOK

INSIGHT 2.0 DATATHON 2026

COMPETITION DESCRIPTION

This datathon is designed to challenge participants to apply machine learning and data analysis techniques to predict target outcomes from structured data. Given a dataset comprising various numerical and categorical features, teams must accurately predict the target variable for each instance. The competition features a Kaggle leaderboard followed by an in-person final at IASDS, aiming to advance reliable predictive modelling and structured data analytics research.

ELIGIBILITY CRITERIA

- Solo participation is permitted.
- Participants must be currently enrolled at the University of Dhaka.
- Executive members of IASDS Students' Club and core volunteers are not eligible to ensure absolute fairness.
- Cross-department teams are allowed.

TEAM FORMATION

- Teams may consist of a maximum of 3 Members..
- Every team must appoint a Team Leader, who will serve as the primary point of contact for all official communication.
- Team modifications (adding/removing members) after registration are not permitted.
- A participant may belong to only one team.

REGISTRATION

- All teams must fill out the official registration form by **26 August, 8 pm**.
- The registration fee for each team is **150 Tk**.
- To verify student status, each participant must submit a valid **DU Registration ID** during registration. (eg. 2023214060)
- Ensure that the email address provided has a valid and verified **Kaggle account** associated with it for each team member.
- The Kaggle link will be emailed to **the team leader** after registration.
- A **Discord server link** will be provided in the confirmation mail. Joining the official Discord server is mandatory for all participants. All important announcements and competition-related updates will be communicated through the server.
- Registration form link: **[CLICK HERE](#)**

COMPETITION FORMAT

The Datathon will be conducted in two rounds:

- Round 1: Online Qualifier Round
- Round 2: Onsite Presentation Round

Only the **Top 10 teams from the qualifier round will advance to the final round based on the private leaderboard ranking. Then, based on the notebook, the Top 5 teams will be invited to present their work at IASDS.**

Online Qualifier Round:

- The qualifier round will be conducted online using Kaggle.
- Participants may compete from any location using their own devices.
- Teams will be given:
 - A dataset
 - A problem statement
 - Submission format
- Teams must submit predictions/models by the deadline.
- Ranking will be based on automated leaderboard scoring.

Grand Finale (top 5 teams only):

- The final round will be held in person at IASDS.
- Judges will actively evaluate the presentation and methodology.
- All qualified teams must be present with their required equipment.
- Participants must bring their original student ID cards for verification during reporting.
- Failure to provide valid identification may result in disqualification.

Dataset and Tools:

The dataset will be provided at the start of the contest.

Example Datasets:

- Classification
- Regression
- Clustering
- Lifetime Data
- Financial data

Using AutoML tools (automated pipeline generation) is prohibited.

SUBMISSION

Participants must submit prediction results in CSV format (submission.csv) through Kaggle. Kaggle will evaluate submissions against the hidden ground truth labels to generate leaderboard rankings.

Each team may submit up to 6 submissions per day. Before submitting, ensure that you have joined your designated Kaggle team.

Required Deliverables:

- Prediction file (submission.csv).
- Notebook with detailed markdown(.ipynb/.rmd/.qmd). Please submit the final model after Hyperparameter tuning.
- A presentation slide which the team will use to present their approach on the onsite day.

Teams must ensure:

- Reproducibility of results
- Proper documentation

We will run your notebook. If your notebook fails to regenerate the results, you will be disqualified.

SCORING SYSTEM

Round 1: Online Round (60% of total)

Based on Private leaderboard(lb) ranking

- The public lb uses 40% of the test data. The private one uses the remaining 60%.
- The private score will be the final determinant of the online round.

Round 2: Final Round(40% of total)

Judges will evaluate based on:

- Exploratory Data Analysis(EDA)
- Feature Engineering
- QnA
- Presentation Slides

JUDGING CRITERIA

- EDA, Data Understanding, Feature Engineering, Modelling.
- Visualization & Analysis: Data visualizations, methodology and results visualizations, other supporting analysis.
- Q&A Performance: Ability to answer technical question

PRESENTATION SLIDE

- Pipeline & Methodology Description
- EDA & Feature Engineering
- Model & Training Details
- Results

RULES & CONDUCT

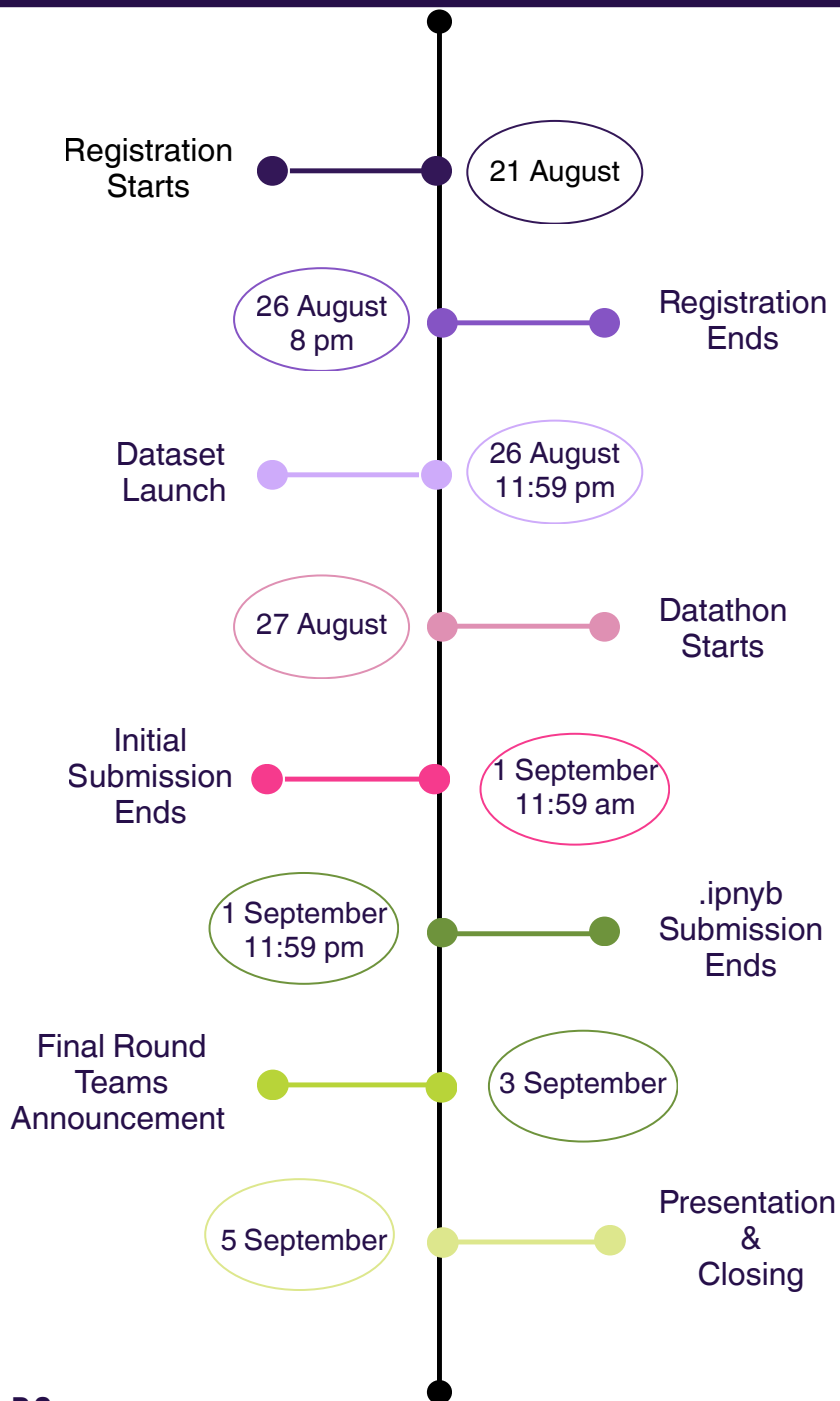

- No leaderboard probing beyond the intended purpose. Using submissions to **reverse-engineer test-set labels** (e.g., systematic label flipping across submissions to infer ground truth) is prohibited and results in **disqualification**.
- Sharing solutions with other teams is prohibited.
- Participants must refrain from **plagiarism or other unethical practices**. All work must be original, and citation and credit must be given for any external sources used.
- **No manual labelling** of the test set. Any attempt to manually inspect, annotate, or otherwise assign labels to the test set for the purpose of improving submissions is strictly prohibited and will result in immediate disqualification.
- The authority may make conclusive decisions at any point during the competition.

PRIZEPOOL

Award Category	Prize money
Champion	5000 BDT
First Runner-up	3000 BDT
Second Runner-up	2000 BDT

- Every team will receive online participation certificates.
- Top 5 teams will receive accomplishment certificates.
- Winner, 1st runner-up and 2nd runner-up will receive crests and certificates along with the prize money.

DATATHON TIMELINE

NEED HELP?

For event or registration-related queries, feel free to contact our executives:
+8801323730122(Nafiu), +8801623602261(Onto)

Or mail us at the address given below.
Mail: m.m.ridvi30@isrt.ac.bd

For IT-related queries: +8801917086678(Ridvi)
Participants can also enquire on the official Discord server.

Any changes to the schedule due to unavoidable circumstances will be announced on the official Discord server and Facebook page.
